

The Six Pack Workout

This is the foundation six pack workout. It gives you regular, large multi-joint exercises to burn calories and get you muscled overall. If you really want to go for muscle size, instead of doing 5 - 6 reps most of your reps, up the number to 7 - 8, since this encourages muscular hypertrophy (size growth) the most.

Do as much as you can, and alter it for whatever shape you're in. If you're out of shape, go easy and get through as many of the ab exercises as you can. Work hard!

Mon.	Tue.	Wed.	Thu.	Fri.
Barbell Back Squat /12 /5 /5 /5	Running 1 Mile or HIIT	Barbell Front Squat /12 /5 /5 /5	Running 1.25 Miles or HIIT	Barbell Back Squat /12 /5 /5 /5
